SCRAMBLE
VAN™

INSTRUCTIONS

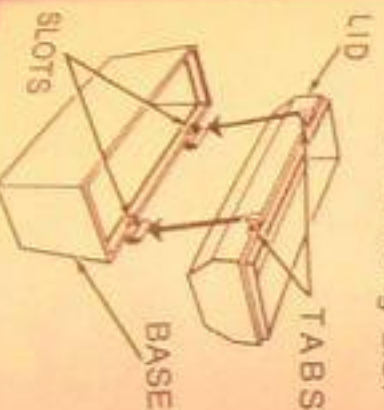

Your SCRAMBLE VAN is based on the fabulous rolling workshop/office/lounge in which Evel Knievel—the world's greatest motorcycle stuntman—tours the country giving his fantastic daredevil exhibitions. The SCRAMBLE VAN features a slide-up windshield, flip-up rear door, and slide-out side panels to give you lots of ways to play! All furniture and small accessories can be stored inside the Van, while the Jump Ramp and its support fit neatly on top and the Bike Trailer hitches on behind.

ASSEMBLY AND OPERATION OF VAN FEATURES AND ACCESSORIES

Tool Box

Insert TABS on LID into SLOTS in BASE and close LID. Box can now be opened and closed without removing LID.

SCRAMBLE VAN

GAS CAN (and FIRE EXTINGUISHER) can be mounted on BIKE TRAILER.

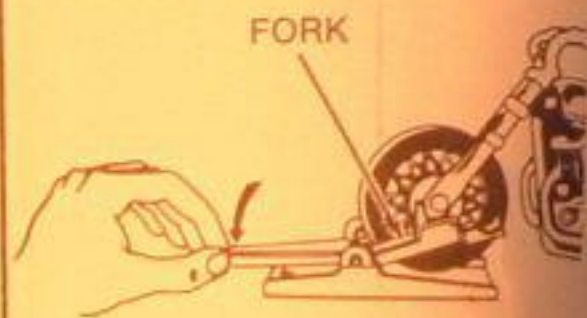

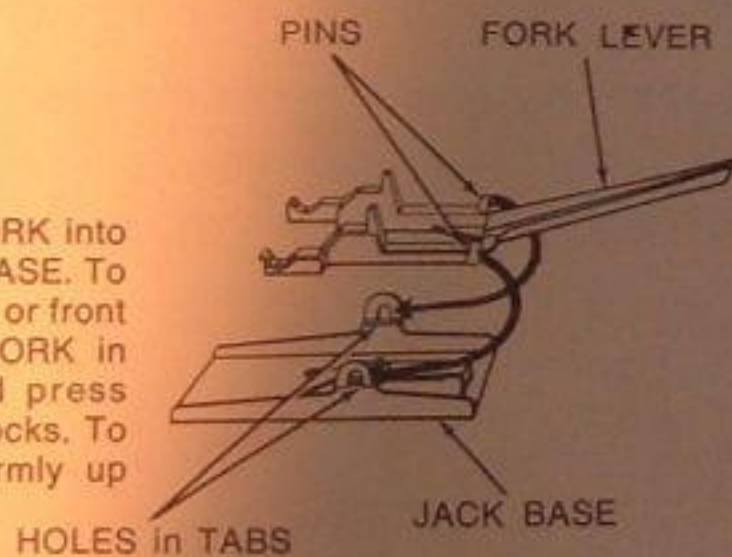

Work Bench

Snap TOP onto BOTTOM as shown.

Bike Jack

Snap side PINS on FORK into HOLES in TABS on BASE. To operate JACK, set rear or front wheels of cycle on FORK in position shown, and press LEVER down until it locks. To release JACK, pull firmly up on LEVER.

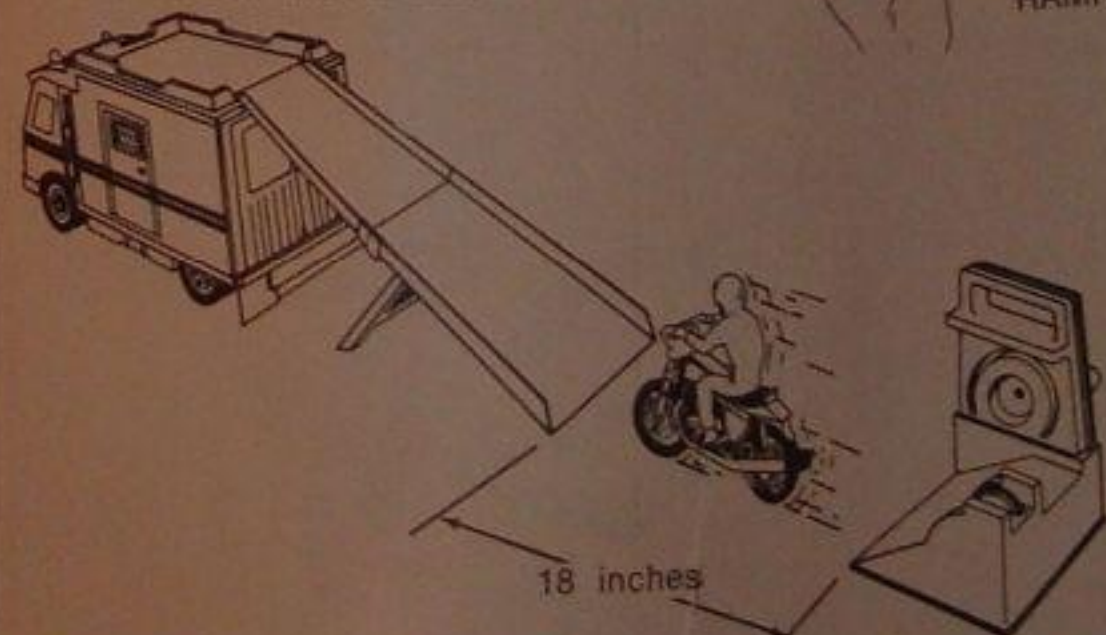

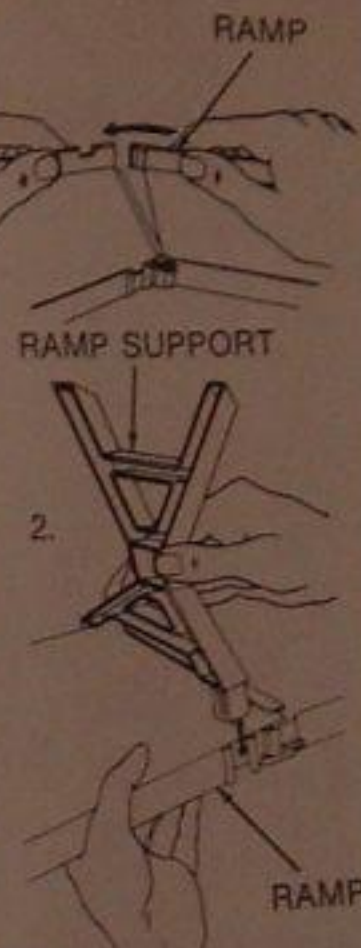

Bike Trailer

Snap AXLE SHAFT into PRONGS underneath TRAILER as shown. Trailer can be attached to Van by inserting PIN on TRAILER TONGUE into HOLE in TAB at rear of Van.

Jump Ramp

1. Snap upper and lower sections together as shown.
2. Snap RAMP SUPPORT onto RAMP as shown.

To perform a jump over the Van, place TAB beneath top end of RAMP into SLOT at rear of Van roof. Launch Stuntcycle (not included) directly toward RAMP from a distance of approximately 18 inches from bottom end of RAMP. For a regular jump, seat Evel Knievel on the Stuntcycle with his hands gripping the handlebars. With a lot of practice, you may even be able to make him do a flip while jumping—to attempt this, lean the figure forward on the Stuntcycle with hands OFF the handlebars.

Van Windshield

Lift WINDSHIELD up, then slide it under CAB ROOF to place Evel Knievel figure (not included) in the front seat.

Side Panels

Both side panels of the Van slide back or completely out for easy play access to both sides of Van. In addition, the left panel has a door that swings in and out.

Rear Panel

To form an outdoor workshop or lounge area, raise rear door of Van. Slide right-hand side panel back beneath edge of raised rear panel as a back wall. Place SHORT SUPPORT under end corner of right-hand panel, and end of LONG SUPPORT SHAFT into square hole under left rear corner of raised back panel.

THE KNIEVEL SCRAMBLE VAN

INSTRUCTIONS

THE SCRAMBLE VAN is based on the famous daredevil, Evel Knievel. The van is made of plastic and is designed to be a fun and exciting toy. It has a large cargo area and a ramp that can be used to load and unload the van. The van is also equipped with a motor and a fan, which can be used to create a breeze. The van is a great toy for children who love to play with vehicles.

ASSEMBLY AND OPERATION OF VAN FEATURES AND ACCESSORIES

Van Body
 1. Insert the van body into the base of the van.
 2. Push the van body down until it is seated in the base.

Van Ramp
 1. Insert the van ramp into the side of the van.
 2. Push the van ramp down until it is seated in the side.

Van Motor
 1. Insert the van motor into the back of the van.
 2. Push the van motor down until it is seated in the back.

Van Fan
 1. Insert the van fan into the front of the van.
 2. Push the van fan down until it is seated in the front.
